Work Experience

Full Stack Developer

CONTENT.T | Digital Agency, Kuala Lumpur, Malaysia

Jul 2024 – Present

- Built immersive, branded web experiences using **React** and **Next.js**, focusing on performance, interactivity, and seamless UX
- Developed scalable backend services with **Firebase Cloud Functions**, managing data storage, user authentication, and access control
- Deployed applications on **AWS**, handling domain management and ensuring high availability and reliability
- Integrated **OpenAI** and **Google Gemini** APIs to enhance user engagement through AI-driven features
- Collaborated closely with designers and brand teams to translate creative vision into responsive, high-impact web applications

Software Developer

CareMate Health, Winnipeg, MB, Canada (*early-stage healthtech startup*)

Jan 2024 – Apr 2024

- Designed, developed, and maintained RESTful APIs using **Node.js** and **Express.js**, enabling seamless CRUD operations for robust data handling
- Integrated **PostgreSQL** and **AWS S3** for secure, scalable data storage, improving system reliability and data accessibility
- Deployed backend infrastructure using **AWS Elastic Beanstalk**, with **CloudWatch** monitoring to ensure scalability and maintainability
- Enhanced security and automation by integrating **API Gateway** and **Lambda functions** for user authentication and request validation
