

Jackson Kao

Jacksonkao97@gmail.com

Winnipeg, MB, Canada

Summary:

Highly motivated Computer Science graduate with a passion for software development and a strong academic foundation. Skilled in both frontend and backend technologies, with hands-on experience in developing REACT Apps and RESTful APIs. My academic journal features a range of successful software development projects, demonstrating my ability to quickly grasp new concepts and apply them to real-world scenarios.

Educations:

Bachelor of Science in Computer Science

May 2024

University of Manitoba, Winnipeg, MB, Canada

Diploma in Infocomm Technology

Jan 2018

PSB Academy, Singapore

Technical Skills:

Java, JavaScript, TypeScript, Python, HTML/CSS, React.js, Node.js, Express.js, GitHub, Git Actions, Docker, VS Code, Android Studio, Docker, MySQL, SQL Server, Tailwind CSS, AWS services

Academy Projects:

Music Player Platform

- Collaborated with a team of 4 to develop a Spotify clone using pure JavaScript, and HTML/CSS, with a focus on applying UI/UX design principles
- Implemented core music player functionalities, including play, pause, next/previous track, and utilized browser local storage to track music status
- Developed over a 3-4 month period

Food Delivery Mobile App

- Collaborated in a team of 3 to develop a food delivery app using Android Studio and Java
- Implemented core functionalities, including login and registration system, intuitive food ordering features, and user account management
- Demonstrated expertise in front-end development and UI/UX design, while contributing to the implementation of the database
- Applied development life cycle principles and Agile methodology throughout the project
- Developed over a 3-4 month period

Real-time Chatting Web App

- Collaborated with a team of 3 to develop a messaging service web app using React.js, Node.js, ASP.net Core and MongoDB.
- Utilized a technology stack comprising React with TypeScript for the front end, Node.js, ASP.net Core for the backend, and MongoDB for data storage
- Implemented core functionalities, including user registration, login, and messaging features
- Achieved instant messaging functionality using SignalR, and utilized MongoDB to store user data
- Applied best practices in version control using GitHub, and implemented GitHub Actions and Docker for efficient project deployment
- Developed over a 3-4 month period

Pharmacy consulting Web App

- Collaborating with a team of 3 to develop a pharmacy consulting website using React.js, Node.js, and Postgres
- My role is to develop a RESTful API server using express.js, and to integrate the server to AWS Elastic Beanstalk

- Demonstrated expertise in request handling, data validation, error handling, and deploy and monitor the server on AWS Elastic Beanstalk
- Developing over a 3-4 month period

Languages:

English (Intermediate), Mandarin Chinese (Fluent), Cantonese Chinese (Fluent)
