Professional Summary

Detail-oriented Full Stack Developer with a specialization in software engineering and extensive experience building high-performance web applications. Proficient in designing responsive frontends using Next.js, React, and Tailwind CSS, alongside developing scalable cloud-native backend services.

Technical Skills

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React, Next.js, Express.js, Tailwind CSS, Zustand
- **Cloud & DevOps:** AWS (EC2, S3, CloudWatch, Amplify, Route 53, Elastic Beanstalk), Firebase (Functions, Auth, Firestore, Storage)
- **Databases:** PostgreSQL, Firestore
- **AI Integration:** OpenAI API, Google Gemini API, Claude API
- **Tools & Platforms:** GitHub, VS Code, Figma, Canva

Work Experience

Full Stack Developer

CONTEN.T | Digital Agency, Kuala Lumpur, Malaysia

Jul 2024 – Present

- Built immersive, branded web experiences using React and Next.js, focusing on performance optimization, interactivity, and seamless user experiences.
- Developed scalable backend services with Firebase Cloud Functions, managing data storage, user authentication, and granular access control.
- Deployed robust applications on AWS infrastructure, managing custom domains and ensuring high availability and system reliability.
- Integrated OpenAI and Google Gemini APIs to engineer innovative, AI-driven application features that significantly enhanced user engagement.
- Collaborated closely with UI/UX designers and brand teams to translate complex creative visions into responsive, high-impact web applications.

Software Developer

CareMate Health, Winnipeg, MB, Canada

Jan 2024 – Apr 2024

- Designed, developed, and maintained production-ready RESTful APIs using Node.js and Express.js, enabling seamless CRUD operations for robust data handling.
 - Integrated PostgreSQL databases and AWS S3 object storage for secure, scalable data architecture, boosting data accessibility.
 - Deployed scalable backend infrastructure utilizing AWS Elastic Beanstalk, configuring CloudWatch monitoring to ensure systematic tracking.
 - Enhanced application security and automation by implementing AWS API Gateway and Lambda functions for user authentication and request validation.
-

Education & Languages

- **B.Sc. Computer Science (Software Engineering)** | University of Manitoba, Canada | *May 2024*
- **Diploma in Infocomm Technology** | PSB Academy, Singapore | *Jan 2018*
- **Languages:** Mandarin Chinese (Fluent) | English (Fluent) | Cantonese Chinese (Intermediate)
