Academy Projects:

- Music player web app
 - Spent 3 ~ 4 months to develop the app
 - This app is a clone of music player app like Spotify, Apple Music, etc.
 - The main purpose of doing this project is to apply the knowledge of the UI/UX design.
 - My role in this project is front-end developer and UI/UX design.
 - The app is developed using VS Code and pure Javascript, and HTML/CSS.
 - This app is developed in a team of 5 people.

- Food Delivery Mobile App
 - Spent 3 ~ 4 months to develop the app
 - This app is a clone of food delivery app like Uber Eats, Food Panda, etc.
 - The main purpose of doing this project is to apply the knowledge of development life cycle and agile methodology to the project.
 - My role in this project is mostly focused on the front-end development and UI/UX design, while also helping out with the implementation and connection of the database.
 - The app is developed using Android Studio and Java, and the database is implemented using HyperSQL DataBase.
 - This app is developed in a team of 4 people.
 - Chatting Web App
 - Spent 3 ~ 4 months to develop the app
 - This app is a combination of chatting app such as whatsapp and Mentimeter.
 - The main purpose of doing this project is to develop a strong understanding of using github to do the version control and using docker to deploy the project.
 - My role in this project is front-end developer.
 - The app is developed using VS Code and React framework, and the database is implemented using MongoDB.
 - This app is developed in a team of 4 people.
-

Languages:

- English (Intermediate)
- Chinese (Fluent)
