

YEE TSUNG (JACKSON) KAO

Full Stack Developer

jacksonkao97@gmail.com | +6011-6141-6637 | Kuala Lumpur, Malaysia | [LinkedIn](#)

Professional Summary

Full Stack Developer with 2+ years of experience shipping high-performance, AI-accelerated web applications for global brands. Known for rapid delivery under tight campaign deadlines and the ability to manage multiple concurrent projects, using Claude Code as a core workflow tool. Strong cross-cloud background across AWS, GCP, and Firebase, with a track record of end-to-end ownership from feature development through production support.

Work Experience

Full Stack Developer

CONTEN.T | Digital Agency, Kuala Lumpur, Malaysia *Jul 2024 – Present*

- **Delivered global luxury brand campaign websites** under compressed, fast-turnaround timelines, often managing multiple concurrent projects without missing launch dates.
- **Used Claude Code as a core development workflow**, running multiple projects in parallel with AI-assisted multi-tasking to hit tight campaign deadlines; used Gemini API for AI image/video generation and real-time detection features.
- **Owned the agency's internal CRM dashboard product** end-to-end, shipping new features and updates on a fast release cadence and resolving production bugs with quick-turnaround hotfixes.
- **Built cross-cloud backend services** on AWS (Amplify, EventBridge, Route 53, S3, Lambda), GCP (BigQuery, Cloud Functions, IAM), and Firebase (Firestore, Storage, Authentication) to support campaign and product delivery.
- **Extended web experiences into APAC messaging channels** by integrating LINE and KakaoTalk SDKs.
- **Partnered directly with UX/UI and brand teams** to align interactivity, functionality, and stability, translating creative concepts into production-ready React/Next.js builds.

Software Developer

CareMate Health, Winnipeg, MB, Canada *Jan 2024 – Apr 2024*

- **Built and maintained production RESTful APIs** with Node.js/Express.js backed by PostgreSQL and AWS S3, supporting full CRUD data operations.
 - **Deployed and monitored backend infrastructure** on AWS Elastic Beanstalk with CloudWatch, and hardened auth/request validation using API Gateway and Lambda.
-

Technical Skills

- **Languages:** JavaScript, TypeScript, Python
 - **Frameworks:** React, Next.js, Express.js, Tailwind CSS, Zustand, Phaser.js
 - **UI Libraries:** shadcn/ui, Ant Design
 - **Cloud & DevOps:** AWS (Amplify, EventBridge, Route 53, S3, Lambda, EC2, CloudWatch, Elastic Beanstalk), GCP (BigQuery, Cloud Functions, IAM), Firebase (Functions, Auth, Firestore, Storage)
 - **Databases:** PostgreSQL, Firestore, BigQuery
 - **AI Integration & Tooling:** Claude Code (daily, multi-project workflow), Google Gemini API (image/video generation, real-time detection), OpenAI API
 - **Design & Collaboration:** Figma, Canva, GitHub
-

Education & Languages

- **B.Sc. Computer Science (Software Engineering)** — University of Manitoba, Canada, May 2024
